

You know the destination  
**WE'LL HELP YOU REACH IT  
SUSTAINABLY**

### Charting the Course

As dynamic sustainability leaders, Lubrizol's team delivers innovative ingredients that respect our planet. With products that are derived from nature, reduce life cycle environmental impact and are third-party certified, Lubrizol is the supplier of choice for courageous innovation that is grounded in responsible science and delivers excellent performance.

## Our Compass Sustainability Plan

Lubrizon Life Science is setting a clear direction toward a sustainable future. Our Compass Sustainability Plan is inspired by the United Nations Sustainable Development Goals and directs us on a course to improve environmental impact wherever possible and to bring others along on our journey. We do this by leveraging Lubrizon's legendary scientific expertise and directing our best natural resources – our people and our products to be your complete sustainability partner. Lubrizon's ingredients provide the benefits our customers need to achieve their sustainability goals.

## Holistic Sustainable Partnership

Through a collaborative approach, Lubrizon strives to be a holistic partner that understands the sustainability drivers and helps each customer to achieve its goals. We would like to share our expertise and knowledge to establish joint projects that meet our customers' needs.

### Nature-based ingredients with traceability insight

Consumers are asking that beauty products contain natural ingredients but are concerned about protecting biodiversity and avoiding deforestation. For these reasons, supply chain transparency is key for formulators to guaranty the sustainable sourcing of nature-based ingredients.

### Minimalistic/clean labels

Understanding the content of beauty products helps consumers to feel more confident about the product's health and safety. Shorter ingredient labels and "free-from" claims are two frequent solutions used to reinforce consumers' trust of beauty products.

### Biodegradable

Consumers are more conscious about the environmental impact of their daily beauty routine after the products are washed down the drain. Substantiated claims of biodegradation and non-ecotoxicity give consumers an assurance that they can use wash-off products with confidence.

### Responsible formulations

For our customers, the development of formulations that require less energy, raw materials and generate less waste during production, are key to reducing their environmental footprint.

### Fair trade and social impact

Sustainability is not only about the environmental impact. It also means consideration of our activities on humankind. A sustainable supply chain of ingredients ensures fair and ethical working conditions, empowers disadvantaged communities and creates a positive social impact.
